7. CONCLUSIONS:

No data included with this submission. An interim field dissipation studies were reviewed in the EFGWB review of Jan. 17, 1989 to support use on celery (90225, 90227). However, the field dissipation data requirement remain unsatisfied until additional data requested in the EFGWB review are submitted and evaluated.

RECOMMENDATIONS:

EFGWB recommends that registration on celery be denied until all the field dissipation data requested by EFGWB in their review of Jan. 17, 1989 are submitted and evaluated.
